

Prescribing Physician Telephone: \_\_\_\_\_

Prescribing Physician Name: \_\_\_\_\_

The class of amyloid-targeting infusion treatments is associated with potentially serious side effects, including but not limited to amyloid-related imaging abnormalities (ARIA). ARIA (detected by MRI) can cause focal neurologic deficits that can mimic an ischemic stroke. Treating clinicians should use caution before giving thrombolytic therapy.

**For Healthcare Professionals:  
In Case of Emergency**

Name: \_\_\_\_\_

Date of Birth: \_\_\_\_\_

I am currently being treated with an **amyloid-targeting infusion treatment** called \_\_\_\_\_  
(Please fill with treatment name)
